EXPERTISE YOU CAN RELY ON

Over the last 20 years, we have built a solid reputation for supporting partners and customers with a wide range of civil engineering, groundworks and surfacing projects. During that time, we have also added expertise in the installation of sports and leisure facilities and sustainable drainage solutions (SuDS).

We operate with a high-quality fleet of more than 50 specialist machines and provide services on a national scale, consistently delivering high standards across all civil engineering, groundworks and surfacing projects. Each project is meticulously managed from inception to completion, ensuring quality outcomes with durable results.

When you choose to work with us, you can be assured to receive an outstanding service from start to finish and have your project completed within the budget and time frame agreed.

We know that our service, expertise and competitive pricing makes working with us worthwhile.

Mark Crutchley, Managing Director

WHY WORK WITH US?

Delivered On Budget and On Time

With over 20 years' experience, we have a proven track record of delivering timely and cost-efficient solutions to local councils, educational institutions and commercial enterprises across the UK.

Quality Assurance Guaranteed

With a strong foundation of industry accreditations and rigorous staff training, we consistently deliver services to the highest standards. We back our quality promise with a comprehensive guarantee on all our work.

Environmentally Responsible Contractors

Sustainability is at the core of our operations. Our design strategy prioritises eco-friendly solutions, incorporating features such as sustainable drainage systems (SuDS) to provide high-quality, environmentally conscious results.

Dedicated to Safety

Health and safety are our priority, both for our teams and the general public. We employ certified operators and site managers to ensure effective site management and compliance with regulations.

66

The MAC Groundworks team worked quickly and effectively using excellent equipment. They were polite, approachable and professional throughout.

Tom Bradley.

66

On programme, on budget, well informed and friendly staff. Great company to work with.

Raja Khan.

FULL-SERVICE SOLUTIONS CIVILS & GROUNDWORKS

We are specialised in civil engineering and groundworks for commercial and public sector projects, including excavation, drainage and the installation of sub-surfaces and foundations.

Our reliable services cater to a range of sectors such as education, construction, and commercial developments. Regardless of project size, we are committed to delivering sustainable, high-quality results with minimal disruption.

We have extensive experience in delivering infrastructure projects, seamlessly integrating the following specialisations into your development.

Foundations Drainage system installations

Excavation Infrastructure development

Earthmoving Utilities installations

Kerb laying Electrical works

Retaining walls Landscaping

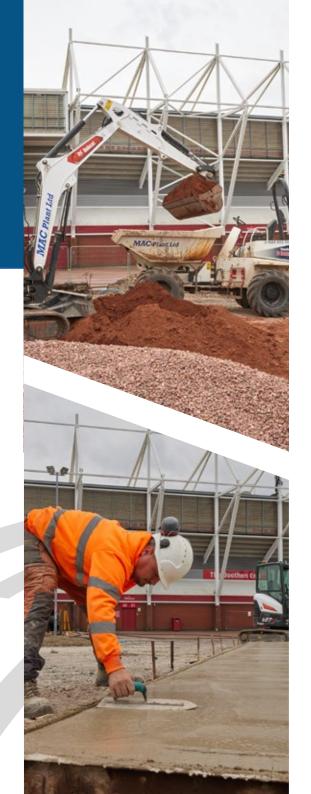

Commercial Project:

Excavating and Installing Concrete Foundations

A new fan zone was to be created at the football stadium in Stoke-on-Trent.

For this site, we were contracted to complete the excavation and foundations in preparation for the construction of the fan zone area.

The main contractor was very pleased with the results, particularly our efficiency and service.

SURFACING

We carry out new construction, resurfacing and remedial work for car parks, multi-use games areas (MUGAs), roadways and access paths for both vehicular and pedestrian traffic.

For a durable and hardwearing surface, many of our projects utilise asphalt surfacing. We also offer specialist finishes, including wet pour, synthetic turf, and a variety of paving options.

Our advanced equipment, such as laser-guided asphalt surfacing pavers, combined with our expertise, ensures a superior finish for every project.

Latest specialist surfacing plant

Masters in asphalt surfacing

Hand lay surfacing teams

Machine lay surfacing teams

Laser-guided asphalt surfacing pavers

Commercial Project:

Car Park & Drainage Solution in Hixon

We carried out specialist works for the development site of a new community church. This included the installation of septic tanks, drainage, kerbing, sub-base and tarmac surfacing works.

To finish, car park line marking was added.

The client was very happy with the works and the final finish for their new church development.

Local Authority Project:

Pedestrian Access Paths

A complete installation of new pathways in Stewartby, Bedfordshire, to improve the walking and cycling route for the community.

Groundworks here included digging out and installing of edgings around the perimeter of the pathway. The surfacing team then laid the stone for the base works followed by an asphalt surface course.

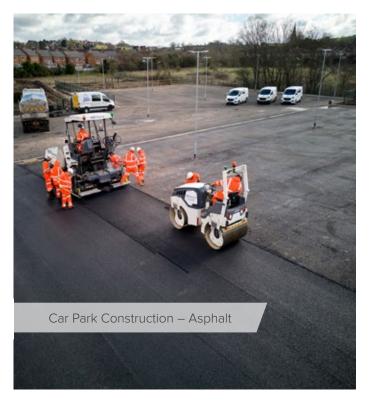

Commercial Project:

Car Park & Road Resurfacing

Resurfacing and line marking were carried out on a car park and adjoining roadway in Leamington Spa.

Alterations under 278 works were made to the vehicular access points. New edging kerbs were then laid throughout. Block paving and ashpalt surfacing were laid. Line marking was then added to finish.

ACCREDITED SURFACING CONTRACTORS

Our industry accreditations and rigorous staff training mean that we consistently deliver services to the highest standards. We are accredited contractors for TARMAC ULTIGUARD – an asphalt solution designed for durability, safety and performance.

66

We have used MAC on a number of contracts over the last 10 years and have found them to be knowledgeable and helpful...always remaining professional.

I would not hesitate in recommending them.

Paul Blackburn

"

SUSTAINABLE DRAINAGE SYSTEMS (SuDS)

We have extensive experience in the construction of sustainable drainage systems (SuDS) projects.

Natural SuDS features, such as ponds, swales, water diversion and detention basins, combine to offer valuable green space, enhance biodiversity and contribute to flood prevention.

With a diverse range of solutions, our teams are adept at delivering SuDS that are environmentally sustainable while providing practical, effective results.

Commercial and Retail Project:

Surfacing & Drainage Solutions for Heavy Machinery

Startin Tractors requested a permeable material to help resolve ground issues on site as well as a suitable and durable surface to withstand heavy vehicles. We installed a sustainable drainage system, then laid a permeable asphalt base course to one area of the yard and block paving to the other.

"We are extremely satisfied with the solution provided ... the yard has turned out exactly how we wanted. The work was carried out quickly and smoothly."

Dave Cooper, Project Manager and Director

SPECIALISTS IN

SPORTS & LEISURE FACILITIES

We are trusted quality contractors for the design and installation of outdoor sports and leisure facilities, approved by the Sports and Play Construction Association (SAPCA) as principal contractors for the installation of multi-sports facilities.

Completed projects include:

Multi-use games areas (MUGAs)

Sports pitches

Skate parks

Cycle paths

Athletics tracks

BMX tracks

Acrylic Painted Sports Surface

Projects are delivered to the highest standard, often incorporating laser-guided layers to meet the accurate specifications demanded by the project brief.

We employ a wide range of materials as required and offer the full range of playing surfaces, including asphalt, artificial turf and wet-pour rubber surfacing.

Education Project:

Installing a New Multi-Use Games Area (MUGA)

A brand-new sports facility has been created for Sandy Secondary School.

We provided a complete service from start to finish for the construction of a synthetic turf football pitch. This included full excavation, sub-base, drainage, installation of sports fencing and surfacing.

Local Authority Project:

New MUGA & Play Area

The installation of a multi-use games area and play area in Brize Norton included groundworks, supply and installation of play equipment, fencing, surfacing and line marking.

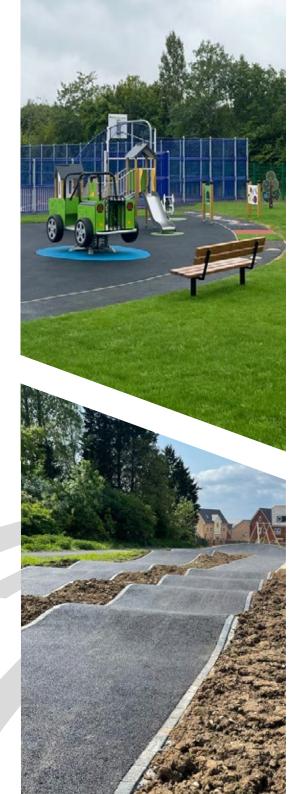

Asphalt footpaths were also installed to link the MUGA and play area together.

Commercial Project:

BMX Pump Track Design & Build

A new BMX pump track was installed at Eagle's Rest housing development in Milton Keynes. The track was designed as a loop with an asphalt surface, incorporating several small rollers and banked turns.

Our team carried out the full project which included groundworks and surfacing to ensure a high-quality track installation.

OUTSTANDING QUALITY FROM START TO FINISH

From initial design to installation, our sports and leisure facility projects are meticulously managed. We always ensure high-quality finishes with superb customer service and competitive prices.

66

Communication is always seamless and their team goes above and beyond to ensure everything runs smoothly on-site.

Andrew Kime

OUR PROCESS

1. Discussion

We review drawings and discuss your project via email or phone to understand the requirements. A site visit can be arranged if needed, with recommendations for improvements or cost savings within your budget.

2. Quotation

Our estimators provide a precise, competitive quote.

We address any queries and revise the quote if necessary.

3. Design

We assist with value-engineering to help with budgeting and engage from the early stages.

4. Planning

We schedule work to minimise disruption and collaborate with other specialists, keeping you informed throughout.

5. Site Preparation

We ensure thorough site preparation, whether for civil work, groundworks or surfacing, for a durable, high-quality finish.

6. Installation

Our skilled teams follow the design brief and relevant standards. A final site inspection ensures the highest quality finish before handover.

PLANT & EQUIPMENT HIRE

MAC Plant Hire offers a fleet of over 30 machines for hire, all available with skilled operators. Our plant hire service provides access to a diverse and high-quality range of construction equipment, capable of meeting any construction requirement.

Skilled operators also available to hire.

Equipment available to hire includes:

Pavers

Dumpers

Planers

Excavators

Rollers
